Our values

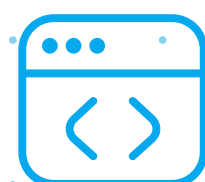

How we work?

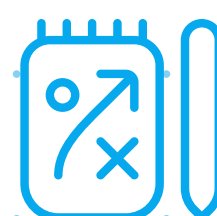

Cooperation Models

	Time & Material	Fixed Price	Outstaff	
	For constantly developing and dynamically changing projects. Payment is made based on the actual hours spent.	For projects that have an approved concept with a clear end result. Payment is made in accordance with the agreed calendar schedule and in accordance with completed sprints or by agreement.	For companies that have their own product and IT Department, and they need to supplement it with individual specialists.	
[Size of the Project]	Medium, Large, Enterprise	Small, Medium	Any	
[Timeframe & Budget Flexibility]	Flexible	Fixed	Flexible	
[Client's control over the process]	Significant	Medium	Full	
[Development Methodology]	Agile	Waterfall	Agile / Waterfall / Kanban	
[Ability to change requirements]	Changeable	Denied	Depends on the project	
[Main Features of each model]	• Working in sprints (Agile approach) and the ability to make changes at any stage; • Visibility of the result at each stage; • Flexible payment system (upon completion of work, weekly, monthly, quarterly).	• Fixed budget; • Fixed scope of works; • Fixed terms; • Impossibility of making changes or additions after signing the contract.	• Experienced specialists who don't need training; • Exemption from paying taxes, sick leave and holidays for the employee; • Support from our CTO, who mentors and advises the hired specialist.

Our Key Industries & Solutions

● [GIS Geographic Information Systems]

- Mapping and Data Visualization;
- Geo-Tagging and Tracking;
- Custom Geocoding Solutions;
- Water Utility Management;
- Resource Planning and Monitoring Systems;
- Land Administration and Geo-Portals.

● [Agritech]

- Farm Management Platforms and Mapping Tools;
- Crop Mapping and Monitoring Dashboards;
- Agricultural Knowledge Bases;
- Digital Interaction Systems for Farmers.

● [EdTech & E-Learning]

- School and Educational Institution Management Systems;
- Inclusive Learning Management Systems (LMS);
- Virtual Classrooms and Online Learning Environments;
- Integrated Multimedia Solutions for Education;
- Game-Based Learning Platforms for Children.

Our Key Industries & Solutions

● [Construction & Real Estate]

- Land and Property Administration Platforms;
- CRM / ERP Systems for Construction and Development;
- GIS Mapping and Visualization Tools;
- Property Valuation and Analysis Software;
- Integration with National Cadastral and Registry Systems.

● [Milltech]

- Software for Military Operations;
- Cybersecurity and Threat Detection Solutions;
- Target Acquisition and Tracking Systems.

This is only the tip of the iceberg of our potential

We are always open to new challenges and ready to implement a custom project of any complexity according to your requirements.

[DATABASES AND SERVICES]

OUR CASES

TTRS

📍 United Kingdom

🎓 E-learning & EdTech

🕒 Ongoing since 2014

Technical Stack: .NET Core, MS SQL Server, Angular, Node.js, Azure Service App

Online learning platform specifically designed to enhance typing skills and literacy simultaneously. Tailored for users with dyslexia, TTRS offers a structured touch-typing course that not only teaches keyboarding techniques but also boosts literacy development

165k

Over 165,000 active platform users

300k

Over 300,000 completed interactive tasks and exercises monthly

40%

Average session duration on the platform increased by 40%, indicating high user engagement

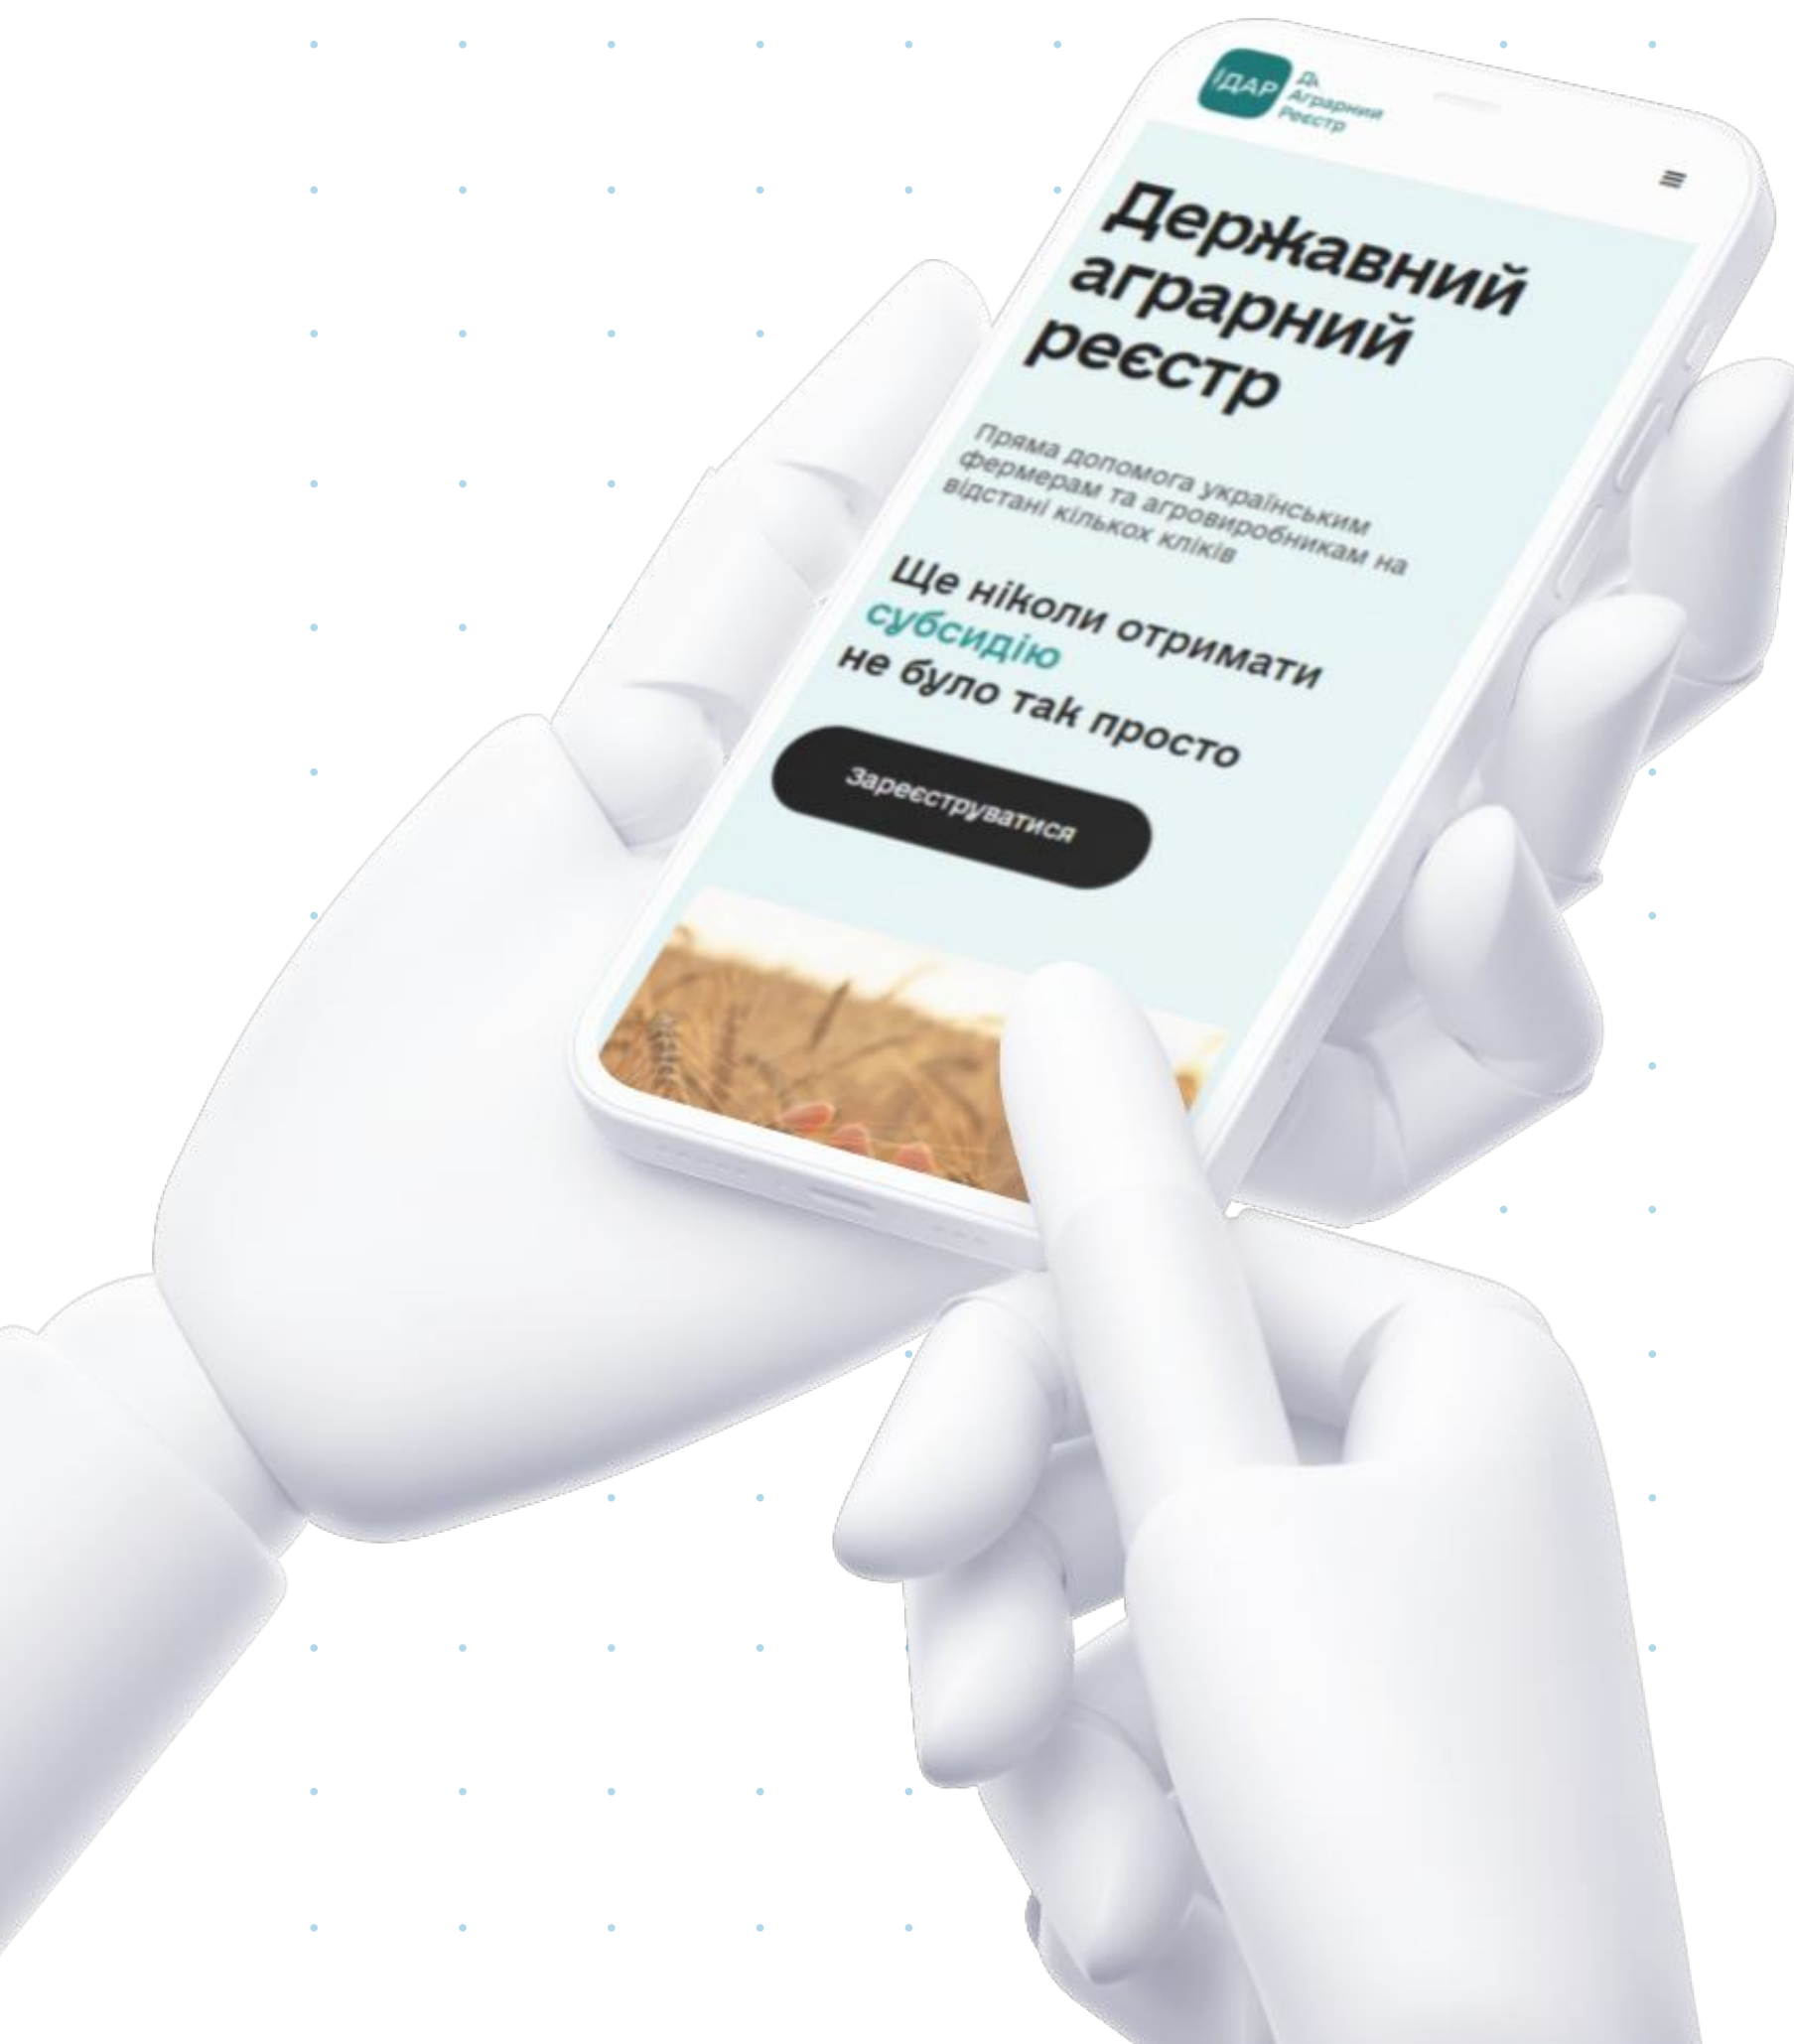

82%

82% of users showed improvements in learning & reading writing skills

43+

43+ countries using TTRS app

State Agrarian Registry

📍 Ukraine

🌾 Agritech

🕒 Ongoing since June 2021

Technical Stack: Net.Core, Angular, PostgreSQL, OpenLayers, Camunda, Apache Kafka

Automated electronic system created by the Ministry of Agrarian Policy with the aim of effectively and transparently attracting and distributing all types of support for Ukrainian agrarians, whether it be state budget funds, concessional loans, international grants, or technical assistance

210+

Over 210,000 active platform users

800+

800 registered apiaries

255k

Over 255,000 applications submitted and processed in support program

180+

More than 180 assistance have passed through SAR system

Modernization of Real Property Registration & Cadastre World Bank Project

📍 Uzbekistan

🏠 Real Estate & Construction

🕒 January 2019 - September 2021

The Real Property Registration and Cadastre Project aims to create an efficient land administration system that enhances property rights security and contributes to real property market development through improvements in land registration, cadastre systems, joint field operations, and institutional arrangements.

THE WORLD BANK

IBRD • IDA

The development team at Breeze Software has undertaken a monumental endeavor in conceiving, developing, and launching the State Agrarian Registry (SAR) system during a period of significant national challenges.

Thanks to the unwavering dedication and relentless efforts of the development team, the system has not only been successfully implemented but has also facilitated the disbursement of financial and technical aid to over 40,000 farmers from partner nations and international organizations, amounting to more than 2 billion UAH.

It's imperative to emphasize the remarkable level of professionalism and commitment demonstrated by the Breeze Software team. Their contributions have been instrumental in bringing the State Agrarian Registry into existence and driving its functionality.
